Swiss Premium Beds

Swissflex bed systems: swiss-made in Flüh (CH)

Swissflex has been manufacturing premium-quality, intelligent bed systems for over 60 years. Our products combine Swiss artisanship, technical expertise and a knack for innovation to create an unparalleled system designed to provide individual solutions for highly demanding users: functional, comfortable and exquisitely designed.

What does Swissflex stand for?

While Swissflex' main focus for many years was slatted frames (duckboards) for beds, in recent years we have further developed our expertise and product range in mattresses and bed frames, making us the leading international Swiss brand for comprehensive bed systems in the high end of the market. Various patents and innovations ensure unique lying comfort – the main requirement for healthy and restorative sleep. Our production facility in Flüh, Switzerland, creates local jobs and ensures the highest-quality swiss-made products.

Swissflex Milestones

- 1949** Company established

Swissflex® Box

Swiss premium comfort in a box spring look

Boxspring beds are on a winning march in Europe and are also conquering the bedrooms even on a global scope. One appreciates the comfortable height and the cuddling effect that these beds show both optically and in use. However, if you prefer to lie on elastic slats made of high-quality plywood instead of springs you should take a closer look at the

SF Box _95RF, height 24cm, headboard Paris 128cm, with fine fabric padding Jersey Steel

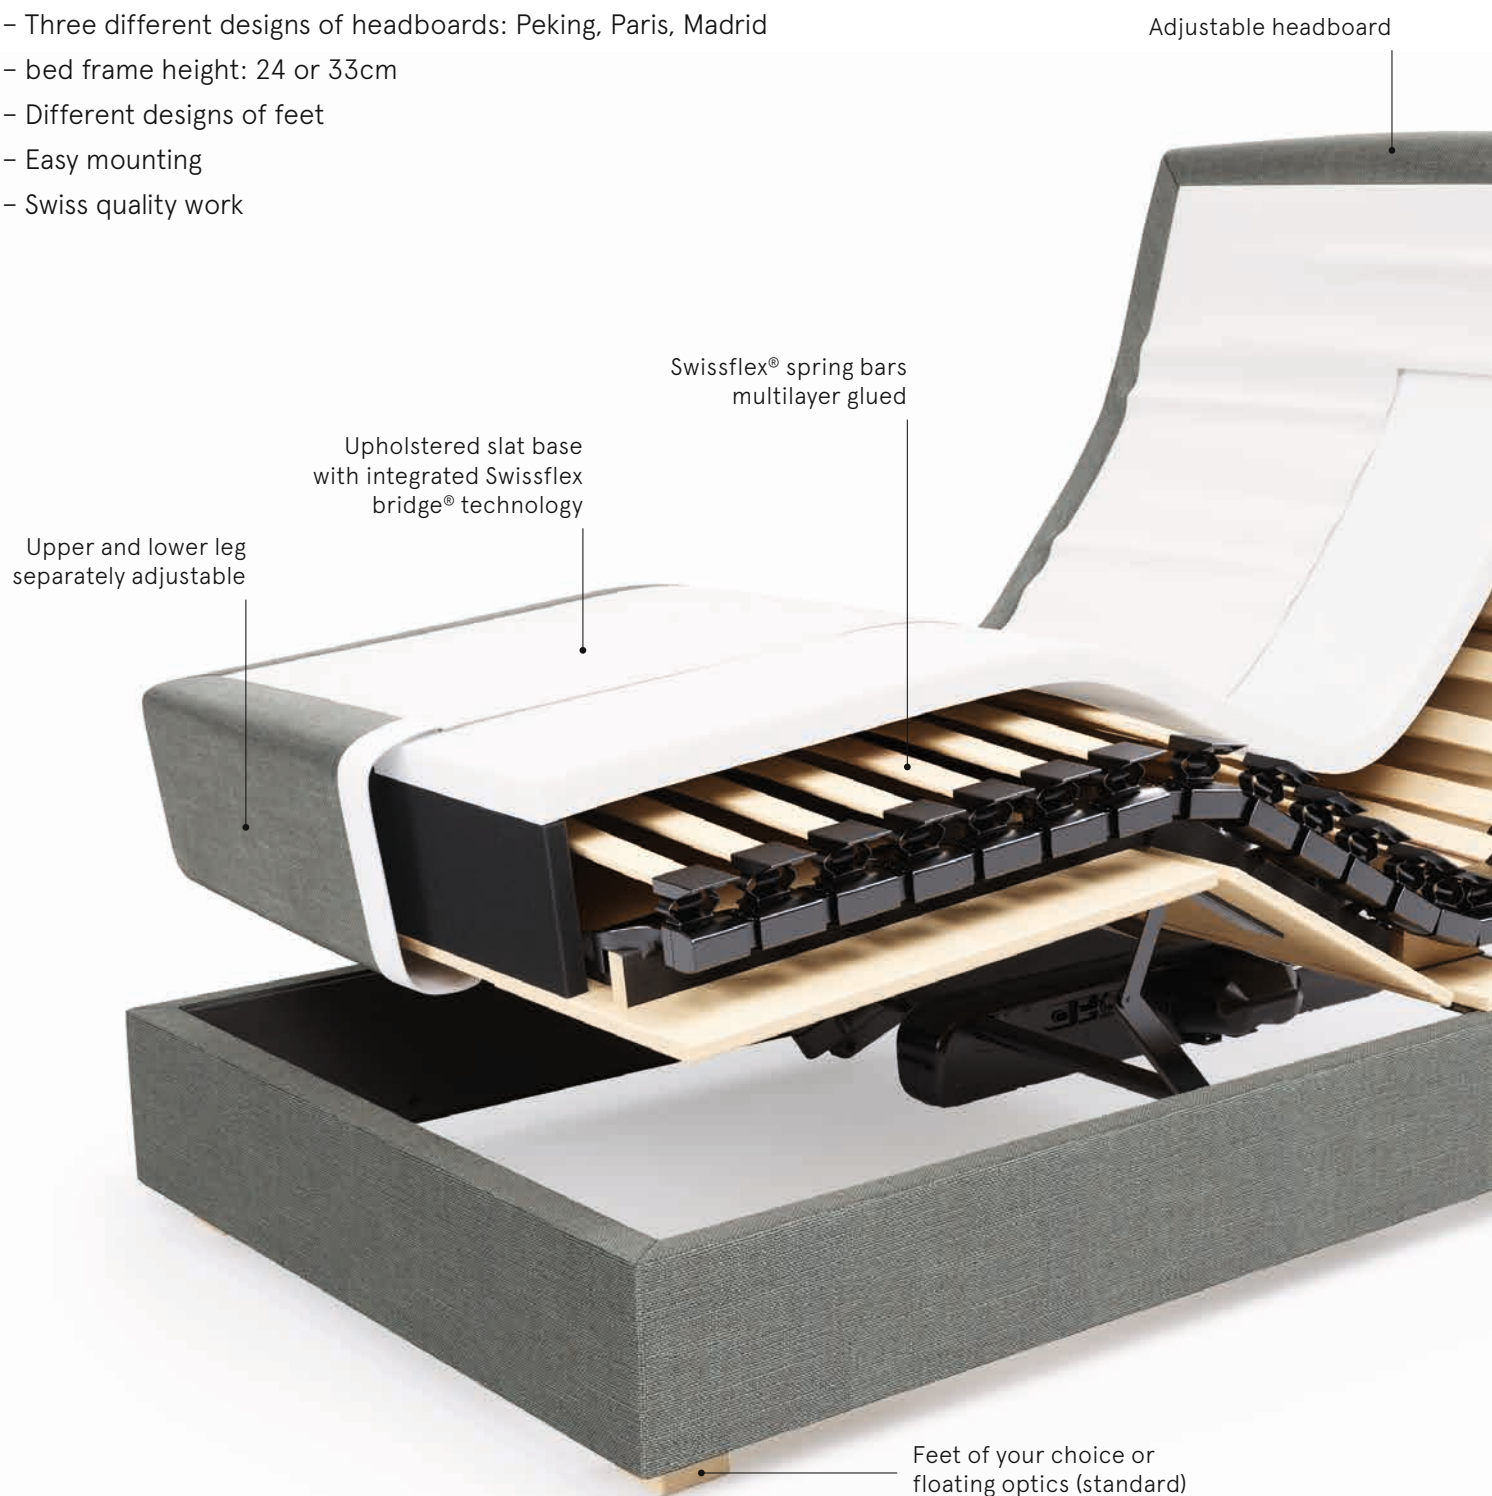

SF Box made by Swissflex – the truly Swiss interpretation of Boxspring! The unrivalled comfort of the patented Swissflex bridge® technology in the state-of-the-art box spring look – including the electrically adjustable version with 4 motors uniquely designed for box spring beds.

Swissflex® Box

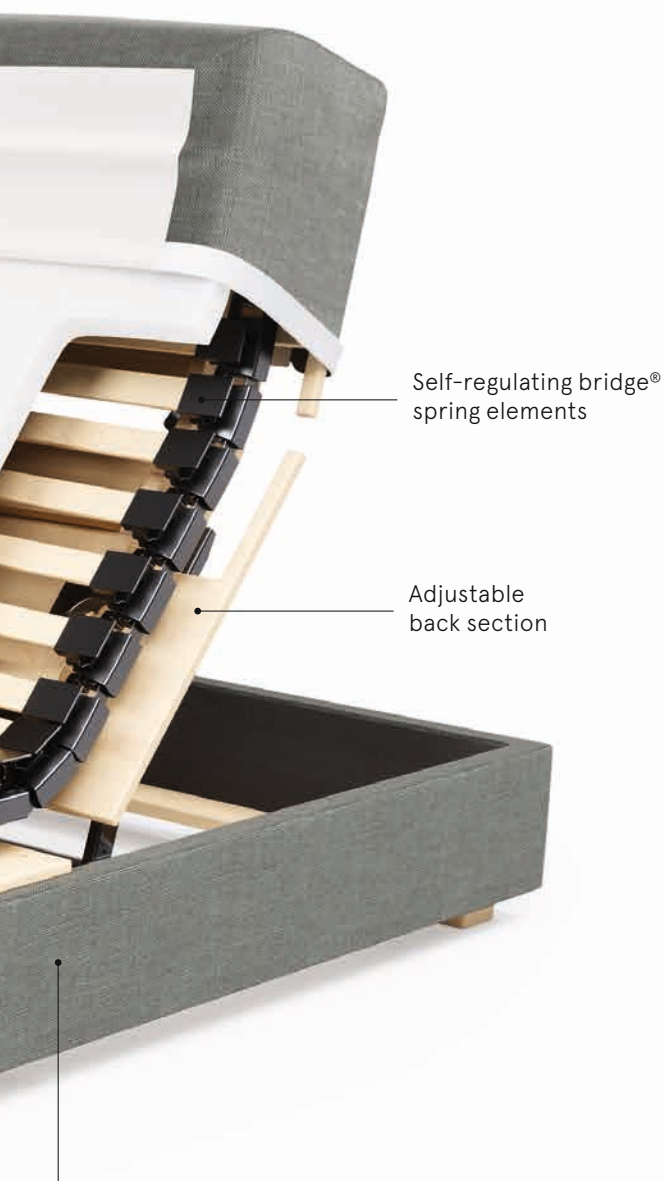

Because the inside matters too

- Classical box spring appearance
- Unique box system with Swissflex bridge® technology on the entire lying surface
- 4-motored slatted frame unique on the market
- Stronger accentuated zoning: lordosis area and shoulder zone
- Swissflex fabric collection:
 - Fabric group 1: 22 fabrics
 - Fabric group 2: 8 fabrics
- Three different designs of headboards: Peking, Paris, Madrid
- bed frame height: 24 or 33cm
- Different designs of feet
- Easy mounting
- Swiss quality work

Self-regulating Swissflex bridge® technology integrated

Self-regulating bridge®

Box upholstered:
Fix version or adjustable
version with 2 or 4 motors
available.

Product features

- Integrated wooden spring bars with Swissflex bridge® technology
- Self-regulating support and relief for the body over the entire lying surface thanks to bridge® spring elements
- Interactive suspension comfort – sensitive reaction to every movement and change in lying position
- Maximum comfort thanks to two versions with radio-controlled, electrical adjustment of the lying surface with 2 or 4 motors.
- Unique for box spring beds: four motors provide uncompromising comfort for reading and watching TV in bed
- Wide range of fabrics and colors – choose your favorite design
- Elegant design variant «single cover» – wrap-around, removable cover
- Scandinavian variant with Deco fabric covered mattresses plus topper
- Three different headboards – find your favorite
- Overlengths 210 and 220cm also available for the taller ones among us
- Widths 120 and 140cm for singles who want to treat themselves
- Floating optics (feet invisible) or beautifully designed feet made of real wood or metal

Origin and quality

All components that we process in our products are sourced from manufacturers in Switzerland and Central Europe. Thanks to the long-standing cooperation with our specialized partner companies, our high standards of quality in workmanship and function are always guaranteed. The manufacturing of our products at our historic location in Flüh guarantees you the best Swiss quality of Swissflex branded products.

Swissflex® Materials

Spring connectors
Our spring connectors consist of beech plywood – hard-wearing and durable.

bridge® suspension
The plastic material used for the bridge® spring elements is based on the latest innovations and is characterized by extremely high resistance and durability.

Components for the electrical adjustable Swissflex® Boxes

The electric motors in our Swissflex® Box models _75RF bridge® and _95RF bridge® meet the highest standards in terms of performance, service life and energy consumption and are operated by radio control. Thanks to EcoTec, all the electrical cables leading from the mains plug to the bed are installed in an almost powerless condition (below 0.5 Watt). In the event of a power failure, they are equipped with a battery-controlled emergency lowering system.
